

Within EPA's Portal, you have the opportunity to navigate to Web sites not included inside the Portal through links in the Portal. Clicking on these links opens up a new windows that lead to external sites. For example, if you are on the "EPA Employee Page," and click on a link within the main body of the page, the link for EPA's Organizational Chart for example, a new window will open to direct you to that site. If you are on the "EPA Employee Page" and click on any link on the left navigation bar, you will be directed to a site within the portal. A new window will not appear.

The Portal provides easy navigation within the site. In order to maintain ease and clarity when navigating to different Web sites from the Portal, the Portal opens up a new window so you are visually aware that you are working outside of the Portal infrastructure. In addition, the Portal is not yet designed to work in conjunction with the different Web sites given that there may be changes in navigation, infrastructure, or access credentials.

If you have trouble accessing new windows, please contact Terry Grady at [grady.terry@epa.gov](mailto:grady.terry@epa.gov)
